Finding Help for Substance Use Disorders (SUDs)

Help Near & Now (HeNN) is a smartphone app that provides a GIS-based, interactive platform to connect people suffering from SUDs, and their families, to services where and when they need them.

HeNN establishes a peer network by allowing users to provide feedback on resources, which can inform providers and policy-makers about the utilization and effectiveness of services.

GOALS

- Widespread use of app
- Decrease morbidity and mortality
- Improved quality of life
- Increased access to and use of SUD services

HeNN is funded by the Delaware Bioscience Center for Advanced Technology
