Group Discussion

COVID-19 & Chronic Health
Emergent needs from this pandemic
Lessons learned
Discuss concerns/future ways to assist those with chronic illnesses
Loss of insurance – need to get assistance for covering things like mammograms
Missing the income guidelines but still in need of help b/c of the COVID-19
Families w/ children who was admitted to the hospital and cannot see them and the stress involved

Epidemiologist – suggestion for an upcoming analysis
Helping those prepare, lessons learned, what can be done better, what resources? Trust partners? Planning and preparedness.

Is there enough Internet in Sussex Co? To offer Telehealth and Virtual Chronic Conditions Programing?
Internet Essentials - Xfinity if in an available area
<https://www.internetessentials.com/>
Other resources include <https://bloosurf.com/residential> & <http://www.dmvwifi.com/coverage.php>

Beebe uses Blue Jeans which is a free app to patients. It is HIPPA compliant and easy to use. Offices "talk thru" instructions to download the app to their smart phone. Some patients use the smart phone of their children to help them. For those without a smart phone or who are troubled with the technology, our office has invited people to come to the office.

Accessibility, equity, planning and grief – we don't think we are through the "worst" of it, residual effects
Long term issues post immediate issues.
Evolving concerns around loss of jobs, insurance, medication issues, being behind on treatment and appointments.
Are we going to get the same support around these important, but potentially overlooked issues?
How do we propel these needs and make sure this is at the forefront and recognized?

Partner Updates/Group Discussion:

Family SHADE Virtual Networking Breakfast - July 1st at 9am, featuring the DE Assistive Technology Initiative.
Please use this link to register and receive a Zoom link:
